

CAPABILITY STATEMENT UTILITY SURVEYS

OUR CHALLENGE

LSTC understands that the success of any site project, be it in the planning, construction, or power industry is heavily dependent on having the most accurate and up-to-date Buried Service Information available.

Our clients depend on us to provide comprehensive buried service information in the most user-friendly, time-sensitive, and cost-effective manner, no matter the scope and scale of the project.

OUR EXPERIENCE

LSTC's dedicated Utility Survey department is an enthusiastic and skilled team that uses the most up to date tracing and GPR equipment. Our team are trained through various utility courses to expand their wealth of knowledge. We can comply with the clients requirements to all survey stages of PAS128. Our topographical expertise further enhances the plans that are produced further enhancing all the recorded utilities.

OUR SERVICES

Our Utility Survey department are trained to carry out all surveys compliant with PAS128 and provide a high standard of utility survey even in the most challenging site environments.

We specialise in fields such as:

- PAS128 Utility Survey Types D,C,B & A
- On Site Utility Locating & Mark Up
- GPR Survey
- Electro-magnetic Locating
- Sonde Tracing
- As built utility survey

WHAT WE DELIVER

- Fully compliant PAS128 Utility Survey.
- Plans delivered to clients specification or PAS128 standard.
- As built surveys for drainage adoption schemes to all local water authorities specifications.
- Full on site mark ups.
- All surveys can be completed to 2D or 3D
- Client is fully consulted from the start to the end of the project ending with a full PAS128 compliant survey and report.

OUR COMMITMENT

Our Utility Survey department is committed to providing you with the most accurate and inclusive buried service information to the highest levels of attention to detail and professionalism. This allows any design or site works to be completed with the greatest of confidence.
